**Technical & Operational** - Controlled substance handling & documentation, Regulatory compliance & record keeping, Inventory management & stock rotation, Time management, Problem solving & critical thinking

## EXPERIENCE

### York Animal Clinic

*Veterinary Assistant*

May 2018-Present

York, NE

- Delivered excellent customer service in a fast-paced environment by addressing needs promptly, providing knowledgeable answers, and ensuring a positive client experience
- Prepared and dispensed prescriptions, including controlled substances, while adhering to strict protocols for accuracy, logging, and accountability
- Maintained accurate records of medication counts and completed required documentation to secure compliance with regulations
- Managed inventory by restocking, rotating, and monitoring products to ensure accuracy and availability
- Communicated and partnered effectively with veterinarians and veterinary technicians to guarantee thorough understanding of each patient's needs
- Upheld a clean, sanitary, and organized work environment to support efficient workflow
- Adapted quickly to changing priorities, worked efficiently under pressure, and collaborated with team members to complete time-sensitive tasks

### University of Texas-Medical Branch

*Research Assistant, Biostatistician Intern*

June 2025-July 2025

Galveston, TX

- Engaged with researchers and biostatisticians to accurately examine patient data, applying strict attention to detail and compliance standards similar to handling medical and pharmacy records
- Verified and recorded data outputs, ensuring accuracy and integrity of results
- Translated complex statistical results into clear, actionable insights for both technical and non-technical audiences
- Balanced multiple projects and deadlines in a fast paced research environment
- Worked with sensitive patient data requiring confidentiality

### The Global Career Accelerator

*Data Analyst Intern, Excel and Tableau Trainee*

January 2025-May 2025

Lincoln, NE

- Skilled in Excel and Tableau, demonstrating comfort with software and databases, which can translate to pharmacy management systems or point-of-sale systems

## EDUCATION
